

We want you to be able to focus on your health and loved ones, and to leave the insurance process to us. We are committed to doing all we can to help you manage any expenses related to our tests.

Biotheranostics believes every clinically eligible patient should have access to our tests, independent of their insurance or financial status. We accept all insurance plans and offer a robust patient assistance program for patients in need.

OUR PROCESS

1. This process starts with your complete insurance information provided on the Biotheranostics test requisition sent to us by your doctor's office.
2. We then contact the pathology department to have your specimen sent for testing. After the test is performed by us, the results are delivered to your doctor.
3. We bill your insurance company. Biotheranostics Patient Advocates are available to discuss the billing process and options that may be available to you to manage your out of pocket expenses.
4. The billing process will take several months and during this time **you will receive communication from your insurance company called an Explanation of Benefits (EOB). This is NOT A BILL.**
5. In addition to the EOB from your insurance company, you will receive a welcome letter from Biotheranostics that outlines our billing and appeals process and contains an important document that you will need to sign and return to us. This Authorization of Representation form allows us to appeal to your insurance company on your behalf.
6. Your insurance company will send payment to us for the test. You may be responsible for a deductible, co-payment, and/or co-insurance as indicated by your insurance plan and required by federal/state regulations. Our Patient Assistance Program is designed to help you manage these out of pocket expenses and is based on your household income and financial responsibilities.
